

FOR IMMEDIATE RELEASE

October 7 Ribbon Cutting Ceremony for TelWorx Headquarters *New, State-of-the-Art Building Has Room for Expansion of Services, Employees*

WELCOME, N.C., September 29, 2009 — TelWorx Communications, LLC, will officially introduce its new, state-of-the-art headquarters and warehouse to the Triad community at a ribbon cutting ceremony on Wednesday, Oct. 7. Beginning at 10:30 a.m., the ceremony will take place at the entrance of the building, which is located at 239 Welcome Center Boulevard in Welcome, N.C.

TelWorx moved to its new location from a business park in Linwood, also in Davidson County. “Our business continues to grow, and we needed bigger facilities to enable that future growth,” says Tim Scronce, president and CEO of TelWorx. “Because there are many advantages to doing business in Davidson County — excellent access to major roadways, railways and air travel; a skilled workforce that serves as a pool of potential employees; and a business-friendly environment —TelWorx will continue to grow and expand our employee base here.”

The new 40,000 square foot headquarters and warehouse space was built by I.L. Long Construction Company and includes many environmentally friendly features. The spacious, open floor plan incorporates an exposed ceiling (which reduces building material waste) and soothing natural colors such as tans and greens with large windows allowing natural lighting as a key element. Occupancy sensors turn off the energy efficient light fixtures when no motion is detected, and reduced-flow water appliances and tankless water heaters conserve water and reduce energy consumption. The TelWorx move and expansion of operations is a great event for Davidson County,

says Steve Googe, executive director of the Davidson County Economic Development Commission. “In these economic conditions, the TelWorx expansion is a welcome addition to Davidson County,” he said. “The company creates highly paid professional jobs with average salaries in excess of \$60,000, which are more than double our current county average wage. Growing companies like TelWorx fit perfectly with our mission of seeing the per capita income and quality of life increase for the residents of Davidson County.”

TelWorx is a leading provider of products, solutions and technical services to the wireless, wireline, data center and government sectors. In addition, TelWorx provides “back office” business processes for its fast-growing sister company, TowerWorx, a manufacturer of mobile tower solutions based in Pryor, Oklahoma.

Refreshments will be served at the ribbon cutting ceremony, and members of the community may tour the TelWorx headquarters.
